Turn off your fuel shutoff valve. Remove your K&N Filter, loosen the carb retaining bolt, remove the two screws holding the black throttle cable/slider assembly to the top and remove the assembly. Remove the fuel line, then pull off the carb. You can turn it upside down at this point to drain out the excess gas.

Comer Carb Tuning - Fast Kart Supply

The most common oil ratio is 8 oz. per gallon, which is 16 parts fuel to 1 part oil also known as 16:1. If you mix 6 oz. per gallon you are now at 21 parts fuel and 1 part oil. The 16:1 ratio has less fuel in it than the 21:1 ratio. So when at 16:1 you may need a larger jet than when you run the 21:1 ratio.

Shell Advance Racing M Oil - Zip North

To an American, however, Honda, besides all this, also means karts, since the brand is one of the most widespread even among kart drivers, with different categories dedicated exclusively to motorcycle-derived engines of the Japanese company. The Honda CR-125 engine has, for many years, been an example.
