Guitar pedals are an important piece of the puzzle in shaping the sound made from your guitar. In their simplest form, pedals are small, metal enclosures housing circuitry you step on to activate; hence the slang name stompbox. Once turned on, it can drive, distort, modulate, reverberate your guitar tone and more, depending on what it's built to do. Your amp and guitar contribute to your overall tone, but a guitar pedal can take it to the next level.

Volume pedals can also be used as a boost effect, by simply playing at less than full volume, then stepping on the pedal to go to full volume momentarily when you need the extra boost. Volume pedals can make a standard electric guitar sound like a pedal steel when used with a well-practiced foot technique. They can also be an important pedal to have in your toolbox when playing in a band with multiple guitars.
