Java User Input The Scanner class is used to get user input, and it is found in the java.util package. To use the Scanner class, create an object of the class and use any of the available methods found in the Scanner class documentation. In our example, we will use the nextLine () method, which is used to read Strings:

Java User Input (Scanner class) - W3Schools

Javadoc is a tool which comes with JDK and it is used for generating Java code documentation in HTML format from Java source code, which requires documentation in a predefined format. Following is a simple example where the lines inside `/*...*/` are Java multi-line comments. Similarly, the line which precedes `//` is Java single-line comment.

Java - Documentation Comments - Tutorialspoint

Read Online Java Documentation String

To create the API documentation, the captains of Java ran a program called javadoc. The javadoc program took lines like these right out of the `PrintStream.java` file and used the lines to make the documentation that you see in your web browser. Other Java programmers do the same thing.

StringBuilder (Java Platform SE 7)

At Java Software, we consciously do not include this level of documentation in doc comments, and instead include either links to this information (links to the Java Tutorial and list of changes) or include this information in the same documentation download bundle as the API spec -- the JDK documentation bundle includes the API specs as well as demos, examples, and programming guides.

String (Java Platform SE 8) - Oracle

The String class represents character strings. All string literals in Java programs, such as "abc", are implemented as instances of this class. Strings are constant; their values cannot be changed after they are created. String buffers support mutable strings.

String is passed by “reference” in Java - ProgramCreek

Java ArrayList. The ArrayList class is a resizable array, which can be found in the java.util package.. The difference between a built-in array and an ArrayList in Java, is that the size of an array cannot be modified (if you want to add or remove elements to/from an array, you have to create a new one). While elements can be added and removed from an ArrayList whenever you want.
