Technical translation is one part of specialised translation; institutional translation, the area of politics, commerce, finance, government etc, is the other. I take technical translation as potentially (but far from actually) non-cultural,

interview questions | InterviewAnswers

Port Manteaux churns out silly new words when you feed it an idea or two. Enter a word (or two) above and you'll get back a bunch of portmanteaux created by jamming together words that are conceptually related to your inputs.. For example, enter "giraffe" and you'll get back words like "gazellephant" and "gorilldebeest".

The critical drawdown ratios were critically dependent
on the Deborah number (De , the ratio of material
relaxation time to process time) and a single material
parameter (αG) of the Giesekus fluid. In the
intermediate range of αG , the stability status
changed distinctively with increasing De , i.e., the
spinning system was initially stabilized and
subsequently destabilized, as De increases.

I'm in the process of designing rock weirs, vortex "U" weirs. It appears that HEC-RAS can only model in-line or perpendicular weirs that completely span the creek at one station. Is there a method to accurately model vortex weirs? I really need accurate water surface elevation information for a proposed diversion. Thanks. Chris Goodell on December 20, 2017. Sounds like a great 2D application
