Statistics, Data Analysis, and Decision Modeling ...

Data analysis is defined as a process of cleaning, transforming, and modeling data to discover useful information for business decision-making. The purpose of Data Analysis is to extract useful information from data and taking the decision based upon the data analysis. Whenever we take any decision in our day-to-day life is by thinking about what happened last time or what will happen by choosing that particular decision.

Bing: Statistics Data Analysis And Decision

Most data analysts possess a high level of mathematical ability, analytical and problem-solving skills, and the capacity to analyze and interpret complex data. The combination of technical knowledge and relevant soft skills allows a data analyst to process, interpret, and analyze data and apply problem-solving skills to support decision-making.
